**OUTDOOR HOT TUBS**

**STANDARD + SELECT + EXCLUSIVE**

# BATHE IN PLEASURE

Novitek® brings the spa to your home. Our outdoor hot tubs are design elements for the yard or terrace, inviting you to relax and enjoy a luxurious hot tub bath without time-consuming preparations. Handmade in Finland, Novitek outdoor hot tubs are designed for northern conditions – they endure time, weather and take good care of their owner for decades.

As a Finnish manufacturer of outdoor hot tubs, we consider strict quality standards to be the priority in all we do: technology, materials and service. The finished design and customizability of Novitek outdoor hot tubs ensure that the hot tub fits perfectly into its surroundings. We want to offer an unforgettable bathing experience – time after time, all year round and for years to come.

Novitek outdoor hot tubs are made using the best possible materials, components and technology. This makes the hot tub's upkeep easy and affordable. The hot tub's operating costs remain moderate year-round, even if the tub is used every day. All Novitek outdoor hot tubs are manufactured in Salo, Finland.

# BATHING IS NOT ABOUT TECHNIQUE. MAKING HOT TUBS IS.

## **SUPREME QUALITY**

Novitek® outdoor hot tubs are made using the best possible materials and components. Such features as the **aluminum frame** that distributes the mass of water evenly, the **American Balboa control panel** and **ABS plastic base** make the hot tub a long-lasting and stylish companion.

## **LOW OPERATING COSTS**

The hot tub's **polyurethane insulation** and weatherproof insulating cover keep the water ready and operating costs low all year round.

### **EFFORTLESS USE**

The water of the outdoor hot tub needs to be changed only 2–4 times per year depending on the utilization rate. Thanks to **fiber filters**, a ozonator and chemicals, the water stays clean and clear for a long time.

### **LOW MAINTENANCE**

The inner surface of the outdoor hot tub is made of **sanitary acrylic**, which is a hard, glossy and easy-to-clean material, making the care of the surface very easy. **The composite paneling** retains its original color well, it is easy to keep clean and looks just as good after many years of use.

### **MADE FOR YOU**

Your Novitek outdoor hot tub is made according to your wishes. Handmade in Finland, Novitek hot tubs are designed for northern conditions – they endure time, weather and take good care of their owner for decades. Order the best tub to fit your yard or terrace.

# NOVITEK® STANDARD

*Simple elegance*

# NOVITEK® STANDARD

## *Simple elegance*

A quality outdoor hot tub is a pleasure that should belong to everyone. Standard is a simple and stylish collection of hot tubs that are a great choice for example as your first outdoor hot tub. The Standard outdoor hot tubs are sold as ready-made packages. They are white on the inside, and the cabinet is beautiful gray composite paneling. These hot tubs are also handmade in Salo – guaranteed Finnish quality.

## WHAT SHOULD I CONSIDER WHEN PURCHASING AN OUTDOOR HOT TUB?

Before purchasing an outdoor hot tub, you should think about where the hot tub will be placed and how many people will be using it. The placement and number of bathers affect the suitable size for your hot tub. The Novitek collection includes outdoor hot tubs ranging in size from 190 x 160 cm all the way to 275 x 220 cm.

Next, it is worth considering what purpose the hot tub will be used for. The choice of hot tub is affected by your own preferences regarding massage features, for example. If you want to invest in massage features, you should consider the number and power of the massage pumps.

The shape of the hot tub also makes a difference. Novitek's collections include hot tubs from simple models to various design options. You can choose between upright seats, lounge seats and something in between. We promise that you can find a hot tub for any purpose in our selection.

# NOVITEK<sup>®</sup> SELECT

*Freedom of choice*

NOVITEK

# ACCESSORIES

The outdoor hot tubs in the Novitek collection are ready to use as they are, but you can make your tub even more luxurious with the customization options and our extensive range of accessories. Some of the accessories are installed at the factory and others you can purchase afterward and install them yourself.

## UV SANITATION

Balboa's WAVETEC254™ sanitation system is designed to withstand the demanding environment of a hot tub. UV light destroys 99% of harmful viruses, bacteria and pathogens without adding any harmful chemicals or gases to the water. UV light reduces the need for chemicals and helps eliminate chloramines and skin and eye irritants.

## 2-SPEED PUMPS

If you want to adjust your massage intensity easily and effortlessly, 2-speed pumps are an excellent choice. With the hot tub's control panel or the Exclusive line-ups Extra Auxiliary Buttons, you can adjust the intensity either lower or higher.

## CONTROLMYSPA™

The ControlMySpa™ remote control makes the use of your hot tub even easier and more flexible. The app connects you to your hot tub from a mobile device wherever you are. The app allows you to adjust the temperature, set up schedules, control the lights and receive notifications, among other things.

## EDGE LIGHT

The Exclusive series of Novitek hot tub's comes standard with this feature. A minimalistic but yet effective lighting system that is integrated on every side of the pool giving it and the surrounding area a Premium look. The system is Phillips HUE compatible so you can connect it with other HUE products if you so wish.

## STATUS PRO

A simple and effective lighting system that indicates the status of your hot tub in real time. Status Pro is attached to the siding of the hot tub with a stylish N® plate. With a quick glance, you can see if everything is okay with your hot tub or if something needs attention. Status Pro utilizes energy-efficient, long-lasting LED technology.

### LED-LIGHTED JETS

Impressive and atmospheric lighting with LED lights. LED-lighted jets and controls are perfect for improving the ambience of the bathing experience. Lighted underwater jets create a beautiful reflection in the water.

### MICROSILK®

There is strength and beauty in water. MicroSilk® is a new, patented form of hydrotherapy that reinvigorates your body and skin and makes you look younger and feel better. The gentle effervescence and silky feel of the water are signs that your body benefits from the saturated water with billions of oxygen-rich microbubbles. These microbubbles increase the water's oxygen level, energize skin cells, stimulate the immune system and collagen production, kill bacteria and boost recovery. Instead of adding any chemicals into the water, MicroSilk® works solely with a pump.

### SINK PANELING

All hot tubs in the Select and Exclusive product families can be equipped with sink paneling as a factory-installed accessory. With this paneling, the hot tub can be sunk into a terrace without separate maintenance hatches built into the terrace. The sink paneling can be placed at most 40 cm from the bottom of the hot tub to the top of the terrace. However, please note that you need to leave at least 50 cm of space by each straight wall of the hot tub to allow for enough room for maintenance.

### COVER LIFT

A Cover lift helps you in your daily Bathing experiences. There are cover lifts with hydraulic aid or plain muscle powered systems. The idea is to make the opening of the pool easier. Even to one person alone. Also, because the spa cover is made from a leather like material it is smart to use a Cover Lift to minimize the risk of puncturing your spa cover by storing it for instance on the ground. Ask your Novitek retailer about the different Cover Lift variants.
