WELCOME TO SWEDEN'S ONLY HOT TUB MANUFACTURER.

HERE IN SKENE, VÄSTERGÖTLAND, WE DESIGN AND BUILD OUR HOT TUBS FOR SWEDISH CONDITIONS. VISKAN SPA WAS FOUNDED IN 2010. WE ARE ONE OF THE LARGEST SUPPLIERS OF PREMIUM HOT TUBS IN EUROPE. IT IS VERY PLEASING THAT SO MANY PEOPLE HAVE DISCOVERED THE BENEFIT OF BUYING FROM US IN SUCH A SHORT SPACE OF TIME.

FOR SWEDISH CONDITIONS.

In Sweden, there is a difference of over 50°C between winter and summer. But the cold is not the biggest challenge. It is the moisture and the wind. That is why we design the hot tub with features that include: the market's thickest shell, a sitting depth that is deeper than those of its competitors, a purification process that makes the water cleaner than drinking water, a uniquely reliable control system, and well-insulated covers that minimise heat loss and provide energy efficiency.

GET CLOSER TO YOUR NEAREST AND DEAREST.

Many of our customers tell us that the great advantage of our hot tubs is that they bring together families and friends. They can disconnect from the world, completely free of tablets and smartphones, and get closer to one another.

So, why not start by browsing the catalogue, find the hot tub that suits you, and let the enjoyment begin?

Johan Eriksson

Charlotte Lindblad

Founders and owners of Viskan Spa.

MADE IN SKENE, VÄSTERGÖTLAND, SWEDEN.

EVERY HOT TUB THAT leaves our factory in Skene, a small town in the region of Sjuhäradsbygden in western Sweden, is the result of a construction process that is rooted in a long industrial tradition and adheres to its traditional values. Swedish manufacturing, as a concept, has historically been synonymous with high quality and user-friendliness – a legacy we do our best to protect and consolidate every day.

Welcome to Viskan Spa, Sweden's only hot tub manufacturer.

A process divided into a number of stages in which each sub-process is equally important to the finished hot tub and must conform to the highest standards. "A chain is only as strong as its weakest link" may seem old-fashioned, but it's the expression that perhaps best describes the challenge faced every day in a manufacturing facility in which the entire production process takes place under one roof.

To achieve good water flow, it's important to have the right type of hoses and for them to be fitted correctly. The hoses are manufactured in Sweden and have an antibacterial agent that helps prevent dirt, bacteria and moisture attaching to the surface.

For us it's important to be proud of what we produce and have full control over what we sell and deliver. Building a hot tub is a craft just like any other.

BUILT FOR THE NORDIC CLIMATE

DISCOVER THE BENEFITS OF OUR
SWEDEN-MADE HOT TUBS.

THE SHELL - THE THICKEST ON THE MARKET

The most important part of a spa is the shell. This is indisputable. That is why we chose to invest in the market's thickest shell, from the best supplier. The shell plate is more than twice as thick as normal, and is made of acrylic and ABS for the best strength and flexibility. The plate is reinforced with several layers of polyurethane (PUR) for maximum strength. This also reduces noise and acts as an extra layer of insulation. It is also much better for the environment than traditional glass fibre reinforcement.

SITTING DEPTH - DEEPER THAN THOSE OF ITS COMPETITORS

Bathing outside in winter is perhaps one of the most enjoyable bathing experiences. But you must be able to sit comfortably, leaning backwards with the water over your shoulders - otherwise it becomes cold. And because Scandinavians are somewhat taller, the design and seating depth are extra important. That's why a Viskan whirlpool is a little deeper than the other hot tubs on the market - take a seat and test it yourself.

UNIQUE OPERATING SYSTEM - LONG WARM BATHS ALL YEAR ROUND

Balboa Watergroup supplies our control systems. In addition to the fact that we chose to use titanium heaters, to extend the life of the heater, in most of our spas, Balboa has also developed a unique control system for us. That means you can run the massage pumps while the heater heats your bathing water. This is a must in our Nordic climate. If not, the water temperature drops very quickly - no matter what insulation you have on the side of the tub.

THE COVER - THICK AND MADE OF HIGH-DENSITY PLASTIC

We also have one of the very best covers on the market. As you know, heat rises. Our cover is thick and made of high-density plastic which, unlike most other covers on the market, provides very good insulation after a few years.

INSULATION - BEST POSSIBLE RUNNING COSTS

Viskan's hot tub provides documented energy efficiency, thanks to several layers of insulation and air barriers, and the way it reuses the heat from the hot tub's pumps. Another advantage of our insulation is that the spa is very service-friendly and easy to operate. This can save you a fortune in the future. Low energy cost + service-friendliness = best possible running costs.

CLEAN WATER - ACS - CLEANER THAN DRINKING WATER

Fresh, clean water is a prerequisite for using and enjoying your hot tub. In order to achieve as high a level of water purity as possible, and with minimal use of various chemical products, we have developed a unique system: the Aqua Clear System. We provide: a unique antibacterial hose; AOP - advanced oxidation process (ozone and UV-C light which, when combined correctly, provides the most powerful, non-chemical, drinking water purification); powerful filters; and an energy-saving, programmable circulation pump.

QUALITY COMPONENTS - THE DIFFERENCE IS IN THE DETAIL

It is the small details, such as seals, o-rings, gaskets and even the silicone and glue that make a big difference. Using the right products for the right purpose is absolutely crucial in terms of the service life of your spa. We use Viton seals for the pumps, as they are about four times better than traditional EPDM seals. Most of our whirlpools utilise a much more secure assembly method for the massage jets. This eliminates the need for silicone and nuts, and does not lead to leakage as a result of poor or obsolete silicone and/or plastic nuts.

SEPARATELY PROGRAMMABLE CIRCULATION PUMP

We have chosen to use a separately programmable circulation pump in all of our models. It provides a quieter tub with lower energy costs and allows you to control how often the water is filtered - from 4 to 24 hours. Wear is also reduced in the other pumps, as these are only used for water massages.

CLEANER THAN DRINKING WATER WITH AQUA CLEAR SYSTEM (ACS).

Viskan Spa has developed **the Aqua Clear System** which makes your bathing water not only as clean as drinking water, but actually cleaner. Components of the system include acrylic sheets (the shell), our filter, anti-bacterial hoses and AOP technology.

THE SHELL - PREVENTS PARTICLES FROM ATTACHING

The surface of the shell is acrylic and is made in such a way that it prevents particles and microbes from attaching and propagating, which can be unhealthy and may cause the shell and the water to look dirty. The shell construction also helps keep the surface shiny and clean, which minimises the time you spend cleaning the hot tub during water changes.

POWERFUL FILTERS - CAPTURE DIRT BETTER.

Good filters are crucial for water quality. A good water filter is characterised by the density of the fibres rather than the quantity of filter cloth. The fibres are denser in our filters than in most other makes, which means they capture more particles and the particles are smaller.

UNIQUE ANTIBACTERIAL HOSE FROM SMÅLAND.

Bacteria usually attach in the tub's hose system and can multiply and lead to the water becoming unhealthy. Our Swedish-made antibacterial hoses are designed precisely to prevent this. The antibacterial agent in the hose helps reduce bacterial growth and provides healthier and cleaner bathing water. The antibacterial agent is part of the hose and is not a material that is applied to the surface that will wear away over time.

AOP CLEANS THE WATER OF POLLUTANTS.

AOP (Advanced Oxidation Process) is a process that uses oxidation to remove organic and inorganic substances (such as bacteria and viruses) from drinking water. This is done by a proper combination of ozone and UV-C light. AOP is the best way to safely clean the water of pollutants.

TIP!

THE HOT TUB CALCULATOR AT VISKANSPA.COM

The hot tub calculator is an easy way to ensure that the water in your hot tub is clear and clean. The calculator takes the hot tub data you enter and calculates how much of each chemical product you must add. It's the perfect tool when you're starting up your new hot tub or want to carry out a water change.

ONE OF THE BEST INSULATED HOT TUBS ON THE MARKET WITH PRO SILENCE INSULATION.

No-one knows our Scandinavian climate better than the people who live here. That's why we work with Swedish insulation experts. As a result of that cooperation, our hot tubs are insulated in several layers around the entire tub, thereby achieving the best insulation properties in terms of both energy and noise.

SINGLE-PIECE BASE PLATE INSULATED IN TWO LAYERS.

The base consists of a high quality ABS plate and comes with insulating thermoplastic.

INSULATION ACCORDING TO THE THERMOS CONCEPT.

There are different theories on how best to insulate a hot tub. Together with Swedish experts, we chose what is referred to as thermal insulation (which you find in many houses in Sweden). That means that we have insulation against the shell itself and 55mm-thick insulation material in the outer frame. The other advantages of the thermos concept are that the heat from the pumps is reused to keep the water warm, as well as making the tub much easier to service.

THE THERMAL FOIL REFLECTS AWAY THE COLD AND MAKES USE OF THE HEAT.

The exterior has a thermal mat that reflects away the cold from the outside and reflects the heat from the hot tub back in. This also works as a diffusion barrier that protects the tub exceptionally well and serves as a wind guard.

THE COVER IS STILL THE MOST IMPORTANT THING OF ALL.

We also have one of the very best covers on the market - and, as we all know, heat rises. Our cover is thick and made of high-density cellular plastic which, unlike most of the other covers on the market, continues to provide excellent insulation after a number of years.

INSULATES AND ABSORBS.

A study carried out by one of the leading suppliers of hot tub control systems on the market shows that hot tub owners rank the noise from the pumps as the biggest disturbance while bathing. We are therefore proud to report that our new insulation, Pro Silence Insulation, not only helps maintain the temperature, but also absorbs noise in a way that is unequalled on the market.

The graph shows noise absorption at various frequencies; the higher the curve, the better the noise absorption.

WE PUT A LOT OF EFFORT INTO PRODUCTION

SWEDEN'S TECHNICAL RESEARCH INSTITUTE DETERMINES HOW MUCH.

People may worry that their electricity bill will shoot up, so a frequent question is: "What are the operating costs of a hot tub?" Accordingly, ever since Viskan Spa was founded, we have paid a great deal of attention to ensuring that the hot tubs are well insulated and have low operating costs. Our own measurements have shown very good results, but we still chose to commission an independent energy consumption test, conducted by SP, the Swedish Technical Research Institute*.

The test was carried out in one of their chambers, in which the ambient temperature was set to 7.5°. This corresponds to the annual average temperature in Central Sweden. The spa was allowed to stand idle for approx. twelve hours after it reached 38°, and the water was not heated using energy, i.e. the water temperature was higher than 38° when the test started.

ALL THE SYSTEM'S PUMPS, LIGHTING AND HEATERS WERE RUNNING.

This was to get a true measurement value - a maximum value. When comparing energy consumption, it is important to note the number of pumps and the size of the heater. These of course use more than weaker pumps and smaller heaters, but we have chosen to use powerful

pumps to provide a better and more powerful massage, and a separate circulation pump, and we believe that a 3 kW heater is required to maintain water temperature in cooler outdoor temperatures. Using, for example, a 1.5 kW heater means that the temperature drops several degrees quite quickly when bathing and the heater cannot maintain the water temperature.

A RESULT TO CHEER YOUR WALLET.

The result of the test shows that two 30 minute baths twice a week have an average electricity consumption of 260 kWh/month. As electricity prices may vary, we choose to show the result in kWh.

*A Viskan Lindö placed in the Tesla measuring chamber at the Swedish Technical Research Institute.
A semi-anechoic chamber adapted for emissions and immunity testing.*

TESTED AND APPROVED FOR THE EUROPEAN MARKET.

Electromagnetic compatibility (EMC) is the ability of apparatus, equipment or a system to operate in its electromagnetic environment without giving rise to unacceptable interference in that environment

The EMC Directive (2014/30/EU) is an EU Directive that applies to electromagnetic compatibility within Europe. It aims to avoid separate national requirements by restricting legislation to overall requirements for safety, health and the environment, or other requirements in the public interest, and equipment must therefore be CE marked before it can be placed on the market. With the CE mark, the manufacturer shows that the product meets all essential requirements both in the EMC Directive and in other relevant directives.

HOW THE TEST WAS CARRIED OUT

The test was carried out on a Viskan Lindö in the Tesla measuring chamber at SP – the Swedish Technical Research Institute. A semi-anechoic chamber built for projects of this type. Tests are carried out on emissions and immunity: cable and radiated interference. Measurements were taken at a distance of 3 m. The absorbent material was a combi-absorber, which ensures good test conditions over a wide range of frequencies.

The hot tub was in full operational mode during the emissions and immunity test, with all pumps and LED lights in the working position. The pumps were reset to zero every 15 minutes. Functional tests were performed on the tub before, during and after the tests in order to verify compliance with the specified performance criteria.

THE RESULTS.

The test shows that the Viskan Lindö, on the points tested, meets the limits for emissions and immunity established according to EMC Directive compatibility levels. The limit for maximum permitted emissions (EN 61000-6-3:2007/ A1:2011) is lower than the compatibility level for a particular electromagnetic interference. In the same way, the limit for minimum permitted immunity (EN 61000-6-1:2007) is higher than the compatibility level for a particular interference.

OUR PROMISE TO YOU AS A VISKAN SPA CUSTOMER.

- To deliver products bearing the CE mark with safe, interference-free electricity so you can focus fully on the user experience.
- To be able to provide documentary evidence that our products have been tested and approved according to the established requirements for electromagnetic compatibility within the EU.
- As far as the development of products is concerned we are and will continue to be at the forefront when it comes to adaptations according to directives and standards designed to promote health, safety and the environment.

WATER THERAPY – AN INVESTMENT IN YOUR HEALTH.

Water is necessary for all life and that is perhaps why we human beings are naturally drawn to water. In water we feel weightless, full of life and peaceful at the same time. A hot tub is the perfect way to unwind and recover after a hectic day. Get into the water, let your body absorb the warmth and feel your muscles relax.

There are many health benefits to a hot massage tub. When the body warms up, blood circulation increases and makes blood vessels dilate. Lower blood pressure, less stress and temporary relief of joint and muscular pain are some of the effects that many people experience in their hot tub.

Having a hot tub as the natural heart of a group of people or as a social hub also gives a chance to free up quality time with family and friends, which also affects well-being and helps create an overall positive feeling. Get together for a while in a warm atmosphere free from everyday distractions and feel how the water massages you and releases endorphins – the body's own natural feel-good medicine.

A few documented health benefits:

- ♥ Natural remedy against insomnia
- ♥ Reduction of stiffness and swelling
- ♥ Beneficial for arthritis (though not all kinds of arthritis)
- ♥ Eases type 2 diabetes (lower blood sugar levels, better sleep)

JETS – MASSAGE ON YOUR TERMS.

All our hot tubs are equipped with different types of massage nozzles - jets that treat muscles and joints in different ways. From the smallest jets, which provide a powerful, deep, single-point massage, to the big rotating jets, which provide a nice pummeling feeling on the back.

There are also fixed, directional nozzles that provide a more powerful, fixed massage stream, and rotating massage nozzles for a vibrating massage effect. Most of our massage jets are adjustable and can be shut off separately, providing a high degree of flexibility.

FIXED, DIRECTIONAL, SINGLE-POINT MASSAGE

These massage jets provide a powerful, direct massage on a specific point. The nozzle is directional, which allows you to direct the massage stream where you want it.

PULSATING MASSAGE

The massage jets provide a more intense, pulsating massage effect than the fixed massage jets. These jets really enhance the quality of the massage.

PUMPELLING MASSAGE

The rotating massage jets provide a pummeling massage over a larger area than the fixed jets. Massaging with our large rotating massage jets is as close to a "real" massage as you can get. Rotating massage jets provide a slightly more powerful, spiral-like massage stream.

NECK MASSAGE

Our neck massage is great when your neck and shoulder muscles are tired and tense. A pummeling massage relieves tense headaches and reduces stress in the body. Some people regard it is the absolutely best massage the tub offers.

FROM HEAD TO TOE. A full-body massage in warm water works miracles for strained muscles and joints. Relax and feel the jets go to work.
*The tub in the images is a **Viskan Lindö**.*

Foot massage.

AROMATHERAPY.

Our hot tubs in the V series and the Spatunnan provide you with the option of enjoying an aromatherapy bath. There is a built-in reservoir at the edge of the tub. You lift the lid and fill it with liquid containing essential oils. Once in the tub, it's easy to select the fragrance you want by pressing the button one or more times. The essential oils are infused into the warm water and are absorbed into the body through the skin and when breathing in.

Our sense of smell is closely linked to our emotions and memories and creates a balance in mind and body. The massage in the tub works at a deep level - beneficial

for both body and soul. Depending on the fragrance in the reservoir, bathing can be relaxing, soothing, restful or refreshing.

Leaning back in the warm water under a starry sky, with the sound of a rippling waterfall in the background and a feeling of total relaxation as your circulation is stimulated and your stiff muscles and joints loosen up is an everyday luxury we all need.

Our fragrances do not foam, affect the pH level or leave oily residues and everything goes back to normal the next time you bathe.

LIGHT THERAPY.

It's all in the detail and what better way to enhance the bathing experience than with mood lighting? All our hot tubs are fully equipped with lighting. A large LED light for powerful underwater lighting, water-level lighting and illuminated switches and control panel create lighting makes the bathing experience something special. The lighting consists of eight colours and five programmes that can be set with a simple press of a button.

Studies have proved that colours stimulate different parts of our body. Maybe that could be something to try out in the tub?

			
RED <i>Stimulates circulation.</i>	ORANGE <i>Improves your mood, makes you more alert.</i>	YELLOW <i>Strengthens the nervous system, sharpens the mind.</i>	PURPLE <i>Muscle relaxing and de-stressing.</i>
			
INDIGO <i>Improves intuition and perception.</i>	GREEN <i>Has a positive and calming effect.</i>	BLUE <i>Relaxing and calming.</i>	

HOW TO CHOOSE YOUR HOT TUB.

1. CHOOSE A MODEL

Choose a spa model that suits your needs in terms of size, design, equipment and massage features. The following symbols will help you find the type of massage you are looking for:

2. CHOOSE A PANEL COLOUR.

FOR THE V SERIES

Alumi Light wood

Alumi black

FOR THE S SERIES

Black horizontal

White horizontal

Grey vertical

3. CHOOSE A SHELL COLOUR.

Sterling

Glacier

Midnight

Opal

Mystic

OUR HOT TUBS: FROM LEMAN TO CORAIL.

We have developed a variety of models to help you find the most suitable hot tub. There are tubs, which only seat one and tubs, in which one or two people can lie down, tubs suitable for a large family and tubs for a small family.

Tubs for having fun with friends and acquaintances or tubs that are best suited for two.

THE V-SERIE.

Our V series offers ten different models. All are equipped with massage jets with different features and sizes for the best massage experience. You will always receive a hot tub with single-point, pulsating and pummelling massage jets. All models are equipped with a separately programmable circulation pump, and several massage pumps, at least one of which has two different speeds (dual speed).

Two of the models also include our Flexi Pump. This pump has three different speeds, as well as a fourth setting where the pump itself changes speed.

This gives you another massage experience dimension. All of the V series hot tubs are equipped with Viskan Spa's comprehensive lighting package, aromatherapy and the market's best cleaning system - AOP.

The tubs' control system is Balboa's (market leader in hot tub control) latest and improved system with a variety of control and safety features.

The heater is titanium and the tub can also be equipped with remote control and music.

GREAT MASSAGE VARIATION.

This hot tub seats six, with a lovely section for lying down, and a corner seat providing neck massages and massage for the forearms, calves and feet.

Three of the massage seats are controlled by a dual-speed pump. At the touch of a button, a soft massage begins, and at a second touch the massage streams become significantly more powerful. The soft massage is perfect for winding down after a powerful pummelling massage, or if the younger children want to swim without excessive massage streams.

The lounge seat has a separate massage pump: multi-speed Flexi Pump. You can change the power of the massage by pressing the button once or you can allow the pump itself to switch between a soft, gentle massage and a powerful, intense massage.

VISKAN ÄNGSÖ

A JOY SHARED IS A JOY DOUBLED.

The Ängsö is a large hot tub (230 cm x 230 cm) which is generously equipped and cleverly designed with two parallel lounge seats. The location of the lounge seats invites you to lie next to each other and enjoy a peaceful, refreshing water massage.

Ängsö has three massage pumps with a range of different features, which means that the water massage can be adapted to suit your own taste.

The tub is equipped with our comprehensive lighting package, ACS water purification system, a waterfall, aromatherapy and a separate circulation pump.

The Ängsö is a premium tub that offers complete enjoyment with no compromises.

VISKAN VINDÖ

STYLISH AND COSY AT THE SAME TIME.

The Vindö is equipped with a double seat in one corner of the tub. This creates a softer, cosier element in the stylish design. Like the other tubs in the V series, you have the comprehensive lighting package for mood lighting, a rippling waterfall and an ACS water purification system that means that your tub requires minimal care.

The Vindö has three massage pumps with a range of different functions that allow you to customise the water massage exactly as you want.

The Vindö is a tub for relaxation and recuperation, but it is also a tub for the family to get closer to one another.

THE HOT TUB WITH TWO LAY-DOWN SECTIONS.

The lay-down sections have different dimensions, but both are designed so that tall and short people can lie comfortably and enjoy a good massage.

With its 53 massage jets and 3 massage pumps, the bath provides a very good water massage. You choose whether you want a kneading, pulsating or single-point massage. You can also choose the strength of the massage.

The bath is equipped with separately programmable circulation pump, aromatherapy, AOP cleaning, dual filters and antibacterial hoses - all designed to minimise maintenance and maximise the enjoyment of your Viskan Mississippi.

VISKAN HÄGGÖ

HÄGGÖ HAS IT ALL.

Add-in light therapy, aromatherapy, ACS purification system, 3 massage pumps, separate programmable circulation pump and 52 wonderful massage jets, as well as a nice lounger and 5 seats of varying sizes and depths. That's the Viskan Häggö for you.

Häggö is a hot tub that has it all. Massage jets with different features and sizes that give you the kind of massage you want and wherever you want it.

A hot tub which allows you to adjust the massage pressure easily, complemented by a beautiful scent and beautiful lights shining in the water. Everything to provide you with the perfect bathing experience.

Tired feet can enjoy a massage regardless of whether favour the lying position or any of the other 5 seats. The Häggö hot tub is ideal for bathing alone or enjoying with several other people.

A HOT TUB THAT WILL MAKE YOU LONG FOR HOME.

Seven seats, four of which are comfortable corner seats. These are very well designed in terms of both size and the number of massage jets. The spa also provides foot massages with adjustable massage jets. Everything to ensure you enjoy the massage you want, and where you want it.

The design and form of the spa allows you to sit easily and comfortably, and provides plenty of space for you, your family and friends. Viskan Björkö is a hot tub, which will make you long to get home.

With an illuminated waterfall, a large underwater lamp and 16 small light bulbs just below the water level, you'll enjoy a wonderfully atmospheric bathing experience.

VISKAN ASPERÖ

EACH MASSAGE SEAT IS UNIQUE.

This six-seater hot tub has deep seats and a lovely lounger. The Viskan Asperö is also equipped with a combined entrance/cool down seat. A place that might be very welcome after a good soak.

Each massage seat in the Viskan Asperö is unique. The hot tub has massage jets of different sizes and different functions on each massage seat. This is to provide a great, total body massage experience.

The Viskan Asperö is a hot tub to relax in.

VISKAN ALMÖ

A LOT OF TUB IN A SMALL PLACE

Viskan Almö is the hot tub to choose when the available space is limited. Despite its exterior dimensions, Almö offers two full-length lay-down points and a seat. The lay-down loungers are designed to allow you to "sit deeply" just like in Viskan Spa's other models.

The mix of large and small massage jets and the ability to switch between kneading, pulsating and single-point massaging, along with a large light package and aromatherapy, make this a great option for those who want the most in a small package.

Almö has separate programmable circulation pump, 2 massage pumps, Viskan Spa's ACS purification system and individual massage strength control. In other words, everything you could wish for in a premium hot tub.

VISKAN ASKÖ

IT'S THE INSIDE THAT COUNTS.

Viskan Askö is a hit spa with a small exterior but a large interior. Even though the bath is only 79 cm high, the seats are shaped in such a way that you are nice and comfortable with a high water level line.

Askö offers a full-length lay-down point and two beautiful corner seats. The hot tub has our best purification system with antibacterial tubes, AOP purification and separately programmable circulation pump. Everything to clean the water as much as possible with minimal maintenance.

The hot tub is also equipped with 2 powerful massage pumps that provide kneading, pulsating and directable single-point massage jets. You can adjust the strength in the seat you are sitting in through an easy-to-operate switch.

AN EXTRAORDINARY EXPERIENCE.

UNDER A STARRY SKY, perhaps with a nip of frost in the air or on a warm summer's evening. All alone, or in the company of your nearest and dearest in a warm atmosphere – free from everyday distractions. A generous number of massage jets, powerful pumps along with mood lighting and stimulating aromatherapy.

*An experience for all the senses, for all seasons.
- Climb in and let the enjoyment begin.*

DISCOVER US ONLINE

@VISKANSPA

THE S-SERIE.

Our S Series features 6 different models, five different shell colours and three different panel colours. You choose the one that suits you best. What all the S Series models have in common are stainless steel jets, ozone purification, separately programmable circulation pumps, antibacterial hoses and the same great basic quality as all Viskan Spas hot tubs.

The S Series also includes a light package, consisting of a large LED lamp and water level lighting, for a beautiful and enjoyable bathing experience on a dark winter evening.

In other words, a very high quality hot tub at a really good price.

VISKAN BOKÖ

TWO LOUNGE SEATS – ONE FOR YOU AND ONE FOR YOUR LOVED ONE.

The Viskan Bokö is one of the latest additions to the S series and the first with double lounge seats. The tub measures 230x230 cm with a good depth and tremendous comfort.

With two massage pumps, rotating jets, a 3kW heater, dual filters, a separately programmable circulation pump, 53 massage jets, underwater and water-level lighting and illuminated switches in various colours, this is a tub to enjoy whatever the season. The tub is also equipped with anti-bacterial hoses and UV-C purification which make care of the bathing water easier and reduce the need for chemicals.

VISKAN SANDÖ

LARGE HOT TUB AND VALUE FOR MONEY.

Of all our hot tubs, the Sandö probably offers the best value for money. It measures 230x230 cm and has the characteristic Viskan Spa hot tub depth.

Sandö has 2 massage pumps, dual filters, separately programmable circulation pumps, 52 massage jets, underwater and water level lighting in different colours, and a 3kW heater. Dolomite has the same high level of equipment as you will find in the premium classes of other hot tubs on the market.

The bath also has antibacterial hoses and ozone generators, which facilitate control of bathing water and reduce the need for chemicals.

VISKAN LÄRKÖ

A HOT TUB TO THRIVE IN.

Viskan Lärkö is a hot tub with directional massage jets for a fun and regenerative water massage.

You can choose from fixed or alternate lighting, and the water treatment system has antibacterial hoses and ozone generators for easy care and maintenance. In short, you will receive a hot tub you can thrive in.

Lärkö is the hot tub for those who like a good bathing depth, a lounge seat and a good water massage without sacrificing quality.

Lärkö will provide many wonderful bathing experiences for you and your loved ones/friends.

VISKAN TROLLÖ

THE SMALL TUB WITH THE BIG HEART.

The Trollö is simple, smooth and easy to care for – which is just as it should be. The Trollö has a comfortable lounge seat and room for a further four people and, in fact, just about everything you could want in a hot tub.

The tub may be small in terms of external measurements, but it has been designed to allow a lot of people to enjoy bathing together. You'll notice that when you try the Trollö.

For its size, it provides plenty of room for the whole family.

VISKAN LOVÖ

IT'S THE INSIDE THAT COUNTS.

The Lovö is a tub that's small on the outside but big on the inside. Despite the fact that the tub is only 79 cm high, the seats are designed to allow you to sit comfortably with a high water level.

The Lovö provides a full-length lounge seat and two pleasant corner seats. The tub is also equipped with two powerful massage pumps that drive the pulsating and directional point-massage jets. You can adjust the strength in the seat you're sitting in using an easily-operated switch.

VISKAN STJÄRNÖ

A LOT OF TUB IN A SMALL SPACE.

The Stjärnö is a tub that makes room where space is otherwise limited. Despite its external measurements, the Stjärnö offers two full-length lounge seats and a single seat.

The lounge seats are designed to enable you to “sit deep” just like in Viskan Spa’s other models.

The tub is equipped with two powerful massage pumps that drive the pulsating and directional point-massage jets. You can adjust the strength in the seat you’re sitting in using an easily-operated switch.

The Stjärnö is the perfect tub for a slightly smaller family or for those who prefer a pleasant massage and bathing experience for just the two of you.

VISKAN SPA TUB

SPA TUB IS ALWAYS READY.

Perhaps you have previously bathed in a wood-fired tub or owned one yourself? Our spa tub saves you having to plan filling the water and wood-firing the hot water for each bath. The spa tub is always ready for a spontaneous, hot and relaxing bath.

The spa tub does not need to be emptied after bathing as the water only needs replacing 3-4 times a year. Like our other hot tubs, the spa tub is always filled with water. In other words, just lift off the cover and slip into the heated bath. Underwater lighting and aromatherapy make the evening extra cosy, just like a spa. Like all our baths, the spa tub comes with a thick lid, a 3 kw titanium heater and a circulation pump/filter for cleaning.

MOUNTED ACCESSORIES

WIRELESS MUSIC PACKAGE

Listen to your favourite music via bluetooth. The music package includes a subwoofer, two speakers, a remote control (only the S series) and an amplifier.

Item no. 50714 (S series)

Item no. 50715 (V series)

REMOTE CONTROL

The remote control means you don't need to move to switch the pumps or lighting on or off. The remote control is waterproof and floats, but should be removed from the water after you've finished bathing. Suitable for the V series.

Item no. 50670

WiFi

WiFi allows you to use an app for wireless control of your hot tub from anywhere in the world. Everything you can control with the hot tub's control panel can now be controlled using your mobile phone. You can change the heat, the filter cycles or just check that everything's OK in the hot tub.

Item no. 50743

BROMINATOR

A factory-fitted option that will help you with water management. The brominator converts bromine salt to bromine and keeps the water fresh and clean. Perfect when you leave the bath unattended for an extended period of time.

Item no. 50737

EXTRA HEATER

Extra heater 3 kW is an extra heater that can be connected to a Viskan Spa hot tub to ensure that the bath temperature is maintained even during long baths in winter.

Item no. 50713

ACCESSORIES

COVER LIFT

We offer several cover lifts for your hot tub. The cover lift makes it easier to remove the cover, which is good for your back and also for the cover.

COVER LIFT I

A simple cover lifting device that lifts the cover over the arms. The cover lift has a base plate which is pushed under the tub so it remains firmly in place.

Item no. 50709

COVER LIFT II

A cover lift suitable for a free-standing hot tub. The cover lift has a base plate which is pushed under the hot tub so it remains firmly in place.

Item no. 50710

COVER LIFT III

A cover lift that's suitable for most hot tubs, whether they're free-standing or sunk into a patio. The lift is attached to the upper part of the panel.

Item no. 50711

HOT TUB STEPS

HOT TUB STEPS 1

Strong, sturdy steps made of the same maintenance-free materials as our exterior panels.

Item no. 50686 (grey)
Item no. 50780 (black)
Item no. 50750 (white)

HOT TUB STEPS 2

Convenient, simple steps that fit our square hot tubs

Art.nr 50706 (grafitgrå)

HOT TUB STEPS ROUND

Strong grey steps for round bath.

Art.nr 50687

HANDLE - EXTRA SUPPORT

Handle for extra support to help you get into and out of the hot tub. The handle has a plate which is pushed under the tub so it remains firmly in place.

Item no. 50708

STORM STRAP

2 straps with clips to pull over the cover and prevent it from blowing off in high wind. The straps are adjustable with a maximum length of 2.80 m.

Item no. 50719

DRINKS TRAY

A floating drinks tray, with colour markings, allows chilled drinks to be served in the hot tub.

Item no. 50718 (grey)
Item no. 50707 (black)

REMOVABLE NECK CUSHION

Manufactured in the same EVA material as our other cushions, but removable.

Item no. 50749

Inflatable with suction cups.

Item no. 50748

SEAT CUSHION

A seat cushion in the hot tub allows those who are not as tall or children to use all the seats.

SEAT CUSHION WATERBRICK.

Item no. 50745

SEAT CUSHION BOOSTER SEAT

Filled with water and attached to the tub with suction cups

FOR THE CHILDREN

SCUBA SMARTTEST

A digital photometer that give you accurate measurements of your PH, alkanitet, chlorine and bromine.

Item no.50746

Refill tablets Smarttest.
Item no. 50746-A

GOOD ADVICE BEFORE PURCHASING.

WHAT SHOULD I THINK ABOUT BEFORE MY HOT TUB IS DELIVERED?

The hot tub must stand on a stable, even surface. Talk to a professional about whether your wooden decking will support it or how deep the gravel bed on your lawn needs to be to avoid settling. If, for example, it is to be built into wooden decking, it must be accessible for servicing since it may be necessary to remove all the panels and work all around the tub. All electrical installations must be carried out by a qualified electrician. The hot tub is filled with a water hose, 1300-2600 litres, depending on the hot tub.

HOW OFTEN MUST THE WATER BE REPLACED?

It must be replaced 3-4 times a year, depending on use and water quality. The electricity must be turned off before emptying. We recommend a submersible pump for quick and easy emptying. While the water is being pumped out, rinse the jets and extractors with a water hose. Filter and suction recesses must be cleaned regularly.

ARE CHEMICALS REQUIRED TO KEEP THE HOT TUB CLEAN?

Although the tub has a circulation pump, particle filters and a UV-C lamp/ozonator, chemicals such as chlorine, bromine or active oxygen are required to keep it clean. Dosages and their use vary. Read the instructions on

each product. Chemicals must also be added when the water is changed or the tub is filled for the first time.

HOW DO I MAINTAIN MY HOT TUB?

Check the pH and chlorine content of the water at regular intervals for the most comfortable bathing and also because tub components can be damaged by an excessively low pH. Use mild low-lather detergents to keep the surface clean rather than products containing abrasives. The cushions should be removed and washed in water. If the hot tub is not going to be used for an extended period, remove the cushions to prolong their lifespan. The exterior panels are cleaned with water and a damp cloth. Do not pressure wash as water may penetrate and damage the electronics.

CAN I EMPTY OUT THE WATER AND SWITCH OFF THE HOT TUB?

We recommend having the tub filled and plugged in at all times. It's difficult to empty all the water out and the pumps and jets risk freezing at cooler temperatures if water is left in the system. In warmer temperatures, there is a risk of algae and mould forming since there is no circulation or chemicals in the water. The circulation pump makes the water circulate, maintains the set temperature and prevents growth of algae. If the tub is not to be used for an extended period, it can be set to Sleep Mode.

WARRANTY TERMS AND CONDITIONS.

As the purchaser and owner of a Viskan Spa, you can feel safe and secure. We and our subcontractors have extensive experience and selection of components, precision and knowledge are important factors to ensure that the product is satisfactory and that it will last a long time.

PROMPT HELP IF SOMETHING GOES WRONG.

However, things can still go wrong. Contact your retailer. For the fastest service, please have your receipt and warranty number ready.

WE PROVIDE THE FOLLOWING WARRANTIES WITH OUR HOT TUBS:

- 10-year frame/framework warranty.
- 8-year warranty on alumi panels
- 5-year shell warranty against cracking and discolouration.
- 3-year component warranty including labour.

Lighting, neck cushions, UV-C lamps/ozone generators, thermal covers and filters are excluded from the warranty as these are consumables with varying lifespans. The warranties apply to hot tubs used for private purposes.

FOR MATTERS INVOLVING WARRANTIES/SERVICING, IT IS VERY IMPORTANT FOR:

All sides of the hot tub to be accessible to our service engineers. We are not liable for any costs associated with making the hot tub accessible for servicing/warranty.

*We reserve the right to make changes without notice.
For printing reasons, the colours in the catalogue may differ slightly from the actual colours.
We assume no liability for printing errors.*

MADE IN SWEDEN.

OUR SEAT DEPTH MEANS YOUR SHOULDERS ARE UNDER THE WATER,
SO YOU CAN ENJOY OUR HOT TUBS ALL YEAR ROUND.
